

CHUKWUEMEKA IROHA OKO

Cybersecurity Analyst | AWS Security | Cloud Security | IAM | Infrastructure Security

okochukwuemekairoha@gmail.com | 07034743984 | Nigeria (Open to Remote & Hybrid)

PROFESSIONAL SUMMARY

Cybersecurity Analyst with hands-on experience securing cloud and enterprise environments through identity and access management, cloud security assessments, and infrastructure security best practices. Currently supporting security operations at Bincom Dev Center while undertaking advanced cybersecurity training through the Ubuntu Bridge Initiative (UBI). Brings over five years of experience supporting mission-critical banking infrastructure, combining operational expertise with practical AWS security, cloud identity management, and technical documentation skills.

CORE SKILLS

Cloud Security: AWS IAM, AWS CLI, Identity & Access Management (IAM), Least Privilege, Cloud Security Fundamentals

Infrastructure Security: Linux, Networking (TCP/IP), Docker, VirtualBox, Git/GitHub

Security Operations: Incident Response, Log Analysis, Security Monitoring, Threat Detection, MITRE ATT&CK

Security Practices: Security Hardening, Vulnerability Assessment, Risk Assessment, Technical Documentation, Root Cause Analysis, SOP Development

PROFESSIONAL EXPERIENCE

Junior SOC Analyst — Bincom Dev Center

February 2026 – Present

- Support security operations through monitoring, investigation, and analysis of security events across enterprise environments.
- Investigate security findings and document remediation recommendations to strengthen system security.
- Collaborate with development teams to improve application security posture and operational resilience.
- Produce technical documentation supporting incident response and security operations.

Cybersecurity Intern — Ubuntu Bridge Initiative (UBI)

June 2026 – Present

- Complete advanced practical training covering cloud security, AWS IAM, incident response, detection engineering, and infrastructure security.
- Conduct security assessments across cloud, endpoint, and network environments.
- Produce technical reports with risk analysis and remediation recommendations aligned with industry best practices.

Founder & Lead Analyst — CyberWatch NG

March 2026 – Present

- Publish cybersecurity awareness content focused on cloud security, cyber threats, scams, and digital safety.
- Develop educational resources that simplify cybersecurity concepts for individuals and small businesses.

Team Lead – ATM Field Operations — Precise Management Systems Limited

January 2022 – February 2026

- Led technical operations supporting more than 100 production ATM terminals across South-South and South-East Nigeria.
- Reduced operational downtime by 30% through structured troubleshooting, root cause analysis, and process improvement.
- Coordinated technical incidents across banking partners, vendors, and engineering teams while maintaining SLA compliance.
- Developed operational documentation and standard operating procedures supporting secure service delivery.

ATM Field Engineer – Technical Support — Precise Management Systems Limited

October 2020 – December 2021

- Installed, configured, and maintained production ATM systems across multiple financial institutions.
- Diagnosed hardware, software, and network faults while providing structured technical support.

SELECTED CLOUD SECURITY PROJECTS

AWS IAM Privilege Escalation Assessment

Technologies: AWS IAM, AWS CLI, MITRE ATT&CK

- Simulated IAM privilege escalation through policy misconfiguration in AWS.
- Identified privilege escalation paths and documented remediation based on least-privilege principles.
- Mapped findings to MITRE ATT&CK Technique T1098 and recommended secure IAM configurations.

Integrated Cybersecurity Homelab

Technologies: ELK Stack, Linux, VirtualBox, AWS Concepts

- Designed and deployed a multi-VM security lab for monitoring, security validation, and attack simulation.
- Integrated multiple defensive security technologies to support security investigations and operational monitoring.
- Applied infrastructure security and system hardening principles throughout the lab environment.

ELK Stack Security Monitoring

Technologies: ELK Stack, Filebeat, Logstash, Kibana

- Built centralized log collection and monitoring pipelines for authentication events.
- Investigated suspicious login activity using Kibana dashboards and custom KQL queries.
- Documented security findings and defensive recommendations.

Web Application Security Assessment

Technologies: Burp Suite, OpenVAS, Metasploit

- Conducted security assessments identifying web application vulnerabilities and remediation opportunities.
- Documented technical findings, risk ratings, and mitigation recommendations supporting secure application deployment.

CERTIFICATIONS

- ISC² Certified in Cybersecurity (CC) (In Progress)
- Cisco Junior Cybersecurity Analyst
- DevOps & Cloud Security – Digital Witch Support Community
- Cisco Networking Basics
- Cisco Introduction to Cybersecurity
- Technical Writing Essentials – Alison

EDUCATION

Bachelor of Science (B.Sc.) Biochemistry

Abia State University, Uturu, Nigeria
